

Minneapolis Landscape Team to Display Ponds and Water Features in Upcoming Show, June 22 & 23, 2013

Inspired Design Landscapes Inc., a Minneapolis landscaping company that specializes in ponds, fountains and water features, will have displays at both the Maple Grove and Rosemount locations in the upcoming Twin Cities Pond and Landscape Tour, on June 22nd and 23rd, 2013.

The 2013 Twin Cities Pond and Landscape Tour, scheduled for June 22nd and 23rd, will take place at several locations and will be an opportunity for people seeking ideas for backyards, ponds and fountains to view plans and talk with a pond expert.

"We are excited to take part in this annual event because it not only gives us an opportunity to showcase our pondless® waterfalls and other water features, but it also benefits the Children's Cancer Research Fund," said Jeff Chudek, who runs Inspired Design Landscapes Inc. with his wife, Becky Chudek.

"We'll be showing three of our pond designs, and there will be about 15 other pond designs as well, all by Certified Aquascape Contractors. Everyone who attends the tour will come away with exciting ideas for ponds, waterfalls, fountains and more. And it's all for a great cause."

Inspired Design Landscapes Inc., which was recently featured in Maple Grove Magazine, provides a complete backyard pond service, from design and installation to ongoing maintenance and troubleshooting. They can provide any piece of the pond building process, from designs and consulting to the complete pond installation to match the home owner's needs and budget.

Jeff and Becky Chudek added ponds, waterfalls and other water features to their longtime Twin Cities landscaping business several years ago by becoming Certified Aquascape Contractors.

They started with their own backyard and built a swimmable pond for the kids that included rocks to climb on, koi fish, and a year-round bubbler that allows the fish to thrive throughout the winter season. By intensively studying ponds and other water features, and installing many different custom ponds over the years, the Inspired Design Landscapes team has mastered the art and science of pond landscaping.
