

Minneapolis Landscaping Company Adds Ponds, Water Features and Water Gardens to Services

[Share](#) |

Inspired Design Landscapes Inc., a landscaping company based in the Minneapolis, MN area, has incorporated the design and installation of ponds, water features and water gardens into their garden design and landscaping services.

Minneapolis, MN (I-Newswire) July 27, 2011 - [Inspired Design Landscapes Inc.](#) a Minneapolis landscaping company, recently added a specialty in the design and installation of ponds, water features and water gardens to their services.

The company is comprised of Jeff and Becky Chudek, a husband and wife landscape service, and a crew of workers. Becky provides garden design services, helps homeowners with landscaping ideas, and installs gardens, while Jeff builds retaining walls, patios and other large installations and personally oversees each landscaping project.

Jeff is a Certified Aquascape Contractor. "We can create any water feature from low-cost, low maintenance fountains to elaborate ponds," he said. "Water features bring life to a landscape, while also bringing people together. Both of those things are goals we pursue with our work."

Becky, who has a degree in horticulture and a talent for garden design, enjoys designing waterscapes. "Water features and water gardens are incredibly flexible landscaping features," she said. "They can be small and inexpensive or fill an entire backyard area. The sound of trickling water in a fountain, or a pretty water feature composed of bubbling water amongst some attractive stones can create a magical outdoor living space."

Many clients come to Inspired Design Landscapes Inc. looking for a retaining wall designer or backyard patio designer and discover that a water feature can be incorporated into their landscape design fairly inexpensively. Simple water features, including all materials and labor start at just \$500.

"We love to match the project to our customer's lifestyle and budget," Jeff said. "We create simple, clean designs that fit the customer's needs and available time." He added, "Our desire to give the best service and design, and build a landscape that fits each family's lifestyle is what brings our customers back."

Water features, fountains and ponds are among many types of projects Inspired Design Landscapes specializes in. The company's retaining wall, patio work and garden design projects keep them busy from spring to fall. Examples of these projects can be viewed on the company website at www.idl-inc.com.

"Once the snow starts falling, we convert over to our snow removal service for the winter," Jeff said. "But Becky continues to do garden design work throughout the winter months in preparation for spring."
